

NEW KITTENS AND CATS

Feeding

Depending on age and size

- ¼+ 5 oz can (1/2+ 2.5 oz can) -> 4x/day (B, L, D, Bedtime)
- 1/8 c. dry for overnight (also stops the 4 am "Feed Me!" antics)
- Fresh, clean water every day or more, depending on its condition
- **NO SEAFOOD UNTIL KITTEN IS 6 MONTHS LD-> They can become very picky eaters, costing you a lot of money**
- Food bowls must be wide and shallow to prevent Whisker Fatigue

Suggested Food: Royal Canin's Mother and Baby Cat (canned and dry) until 5-6 months
Any good canned and dry kitten after that
Alternate with First Mate canned chicken and turkey
Acana beef canned

Litter Boxes

- Basic Rule- 1 box/cat +1
- Suggested Litter- Odour Buster
- Clean every day
- **NEVER** use scented litter-> cats hate it (smell is far too strong)

Introductions to Household and Other Pets

Household: First, introduce to household slowly by having a room for the kitten/cat for a few days. Then, let out in increasing amount of time to let him/her investigate and get familiar with the place.

Pets: Follow the directions given by Jackson Galaxy on YouTube. Basically, it's gradual introductions through supervised steps: 1) Sells and scent exchanges 2) Using carriers to start and then switching off 3) No carriers but supervised

****This can take up to 2+ weeks****
